Grab'n'GO MediaGiant

CM3G

MediaGiant

Record all your favourite TV shows. Share, stream and play your high definition movies, photos and music!

The Media Giant combines a full featured network HD media player with a personal video recorder. You can record directly from your television, DVD player, camcorder or set-top-box (for digital cable or satellite) with the composite AV input, component video input or the digital Firewire™ input. The Media Giant is a high definition network media player which plays all your digital movies, photos and music from the internal hard drive or over your network. You can stream directly from your computer or from compatible storage devices like the Grab'n'GO NAS products. The device is also a DLNA 1.5 compliant media server, so you can stream all your content (even your recordings!) to other compatible network media players or computers.

Specifications
